Beyond Audio inc. Announces CEDIA Electronic Systems Designer Certification

Kelowna, August 24, 2006

Beyond Audio inc. is proud to announce that Mike Ohman has achieved the title of “CEDIA Certified Professional, Designer”, having passed the required certification testing. This designation has been awarded to only a handful of professionals in Canada. “We are extremely pleased that Mike has achieved this level of expertise,” said Joe Zuccherro, Sales Representative for Beyond Audio. The CEDIA Designer certification helps ensure that customers of Beyond Audio know that they are receiving the very best recommendations and systems design available anywhere.

The Certified Designer is a person who communicates with clients, design, and installation professionals, and selects the appropriate products and materials to design residential electronics systems (including alarm, telephone, cable television, satellite television, data, audio, video, home theatre, HVAC, home automation and lighting control).

CEDIA is an international trade association of companies with approximately 3,100 members that specialize in designing and installing electronic systems for the home and office. CEDIA members are established and insured businesses with bona fide qualifications and experience in this specialized field.

Ohman has been in the Custom Electronics Industry for more than 15 years and is the owner of Beyond Audio inc., a Kelowna based Custom Electronics company. Beyond Audio have been designing, selling and installing custom electronics systems in Kelowna for almost 10 years and is considered one of the premiere installation firms in the Province. They won a provincial Georgie Award for outstanding subtrade in 1999 and were a top 5 finalist in the CEDIA Home Theatre category also in 1999.
