Our first “real” home theatre! What a project to undertake, when you know little about what is needed.

Luckily, we stumbled across Mike Ohman of beyondAUDIO in Kelowna. His professional, highly knowledgeable and most of all honest approach helped us navigate through some tough decisions.

Mike made sure we were spending money wisely and not wasting it on items that would ultimately not benefit the experience or quality. In conjunction with our amazing builder, beyondAUDIO created an absolute incredible home theatre that is fully sound isolated so I can play my movies as loud as I like without it being heard in the rest of the house.

With his guidance, we created a separate projection room eliminating any interfering noise from equipment. The image quality and size of screen is perfectly arranged to the size of the room. The result is stunning and we use our theatre many times a week. But the sound, I will only describe with one word: AMAZING!

After moving into our new house, we had some small issues, mostly because of our own learning curve. Mike was there immediately and went out of his way to make sure that our experience was the best as can be.

Thank you for your excellence.
